Summary

As a seasoned full stack web solutions application developer/engineer, I specialize in crafting innovative front-end functionalities and robust Shopify solutions. My expertise spans the spectrum of web development, from custom theme design and Shopify app development to implementing intricate Shopify Plus scripts.

My technical skill set includes proficiency in HTML5, CSS3 (including Tailwind CSS and Bootstrap), Liquid (Shopify's templating language), and JavaScript (including frameworks like jQuery, React.js, and Vue.js). Additionally, I am well-versed in backend technologies such as Ruby (on Rails and Sinatra), Node.js (with Express.js), and MongoDB. I have a strong grasp of APIs and GraphQL, enabling me to integrate diverse systems seamlessly.

I thrive on creating user-centric, scalable solutions that drive business growth and enhance online experiences. With a keen eye for design and a passion for leveraging cutting-edge technologies, I am committed to delivering high-quality, custom-tailored web solutions that exceed client expectations.
